

Customer Success Story

Mobile and Offline capabilities

Nevro had a custom built mobile application that required constant updates and maintenance as simple Salesforce configuration changes forced them to rewrite code. With Pulsar, they have an off the shelf, scalable, enterprise ready mobile application that dynamically absorbs Salesforce configurations and metadata. This means Nevro can focus on their innovation and not spend resources maintaining a software product.

Support for Visit Tracking, Consent Form and Signature

Nevro implemented a seamless experience with Pulsar/HTML integration to enforce a process when it comes to managing hospital visits. The process enables them to run the entire workflow when they are working offline. And it supports presenting the consent form in multiple languages and collect a signature and save it as a PDF file.

Company Description

Headquartered in Redwood City, California, Nevro is a global medical device company focused on providing innovative products that improve the quality of life of patients suffering from debilitating chronic pain. Nevro has developed and commercialized the Senza spinal cord stimulation (SCS) system, an evidence-based neuromodulation platform for the treatment of chronic pain. The Senza system is the only SCS system that delivers Nevro's proprietary HF10 therapy.
